

Photos Storyboard Overview

Login page [1]

Username
typed in bar.

Login button
takes you to
admin page
[2] if “admin”
is entered
and main
page [3] for
other
usernames

A diagram of a login page layout. It features a large light gray rectangular area representing the page. Inside this area, there is a horizontal rectangular input field with the text "Enter username" inside it. Below the input field, there is a smaller rectangular button with the text "login" inside it. Two lines originate from the text on the left: one line points to the input field, and another line points to the "login" button.

Search Page [9]

The diagram illustrates the Search Page [9] with two main search methods: "By date range" and "By tags".

By date range:

- A "back" button is located at the top left.
- Under "By date range", there are two input fields for dates, both labeled "mm/dd/yyyy". The first is labeled "Begin date" and the second is labeled "End date".
- A "search" button is located below the date range inputs.

By tags:

- Under "By tags", there are two sets of inputs for tags, labeled "Tag 1" and "Tag 2". Each set includes a "name" input field and a "value" input field.
- Below the tag inputs is a "Relationship" section with two radio buttons: "AND" and "OR".
- A "search" button is located below the relationship options.

The two search methods are separated by the word "or".

Annotations:

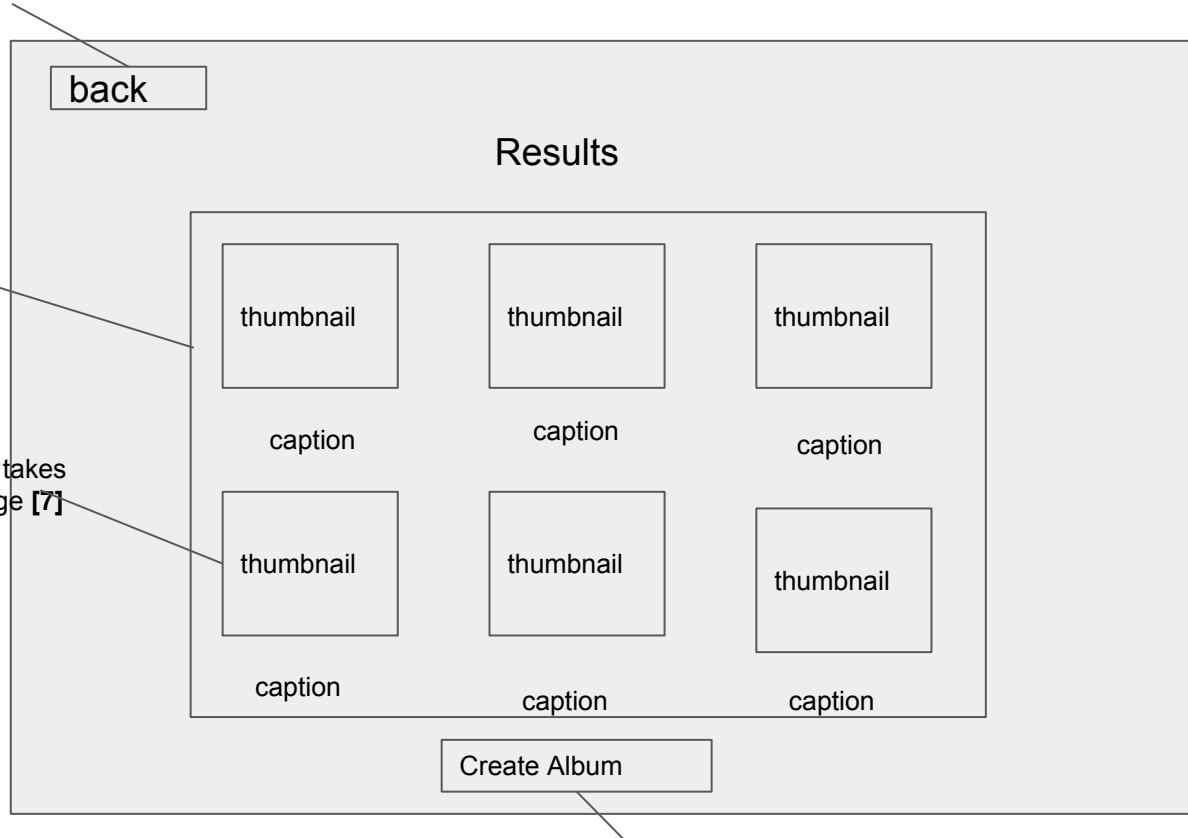

- A line from the "back" button points to the text: "Takes user back to main page **[3]**".
- A line from the "Begin date" input field points to the text: "User enters begin and end date to get range".
- A line from the "End date" input field points to the text: "User enters begin and end date to get range".
- A line from the "search" button under "By date range" points to the text: "Clicking search initiates the search for photos within range and opens search results page **[10]**".
- A line from the "value" input field under "Tag 1" points to the text: "User enters tag name and value for at least one tag. If both are filled, then relationship type (OR or AND) must be selected".
- A line from the "value" input field under "Tag 2" points to the text: "User enters tag name and value for at least one tag. If both are filled, then relationship type (OR or AND) must be selected".
- A line from the "OR" radio button points to the text: "User enters tag name and value for at least one tag. If both are filled, then relationship type (OR or AND) must be selected".
- A line from the "search" button under "By tags" points to the text: "Clicking search initiates the search for photos with those tags and user is taken to the search results page **[10]**".
